PROFILE SUMMARY

Information Technology student specializing in Web Development, with hands-on experience building responsive web applications using HTML5, CSS3, JavaScript, React, and Angular, backed by Node.js, PostgreSQL, and MySQL.
Completed an OJT internship at Clark International Airport Corporation (CIAC), developing an internal risk management system.
Working knowledge of SEO and analytics tools (Google Analytics 4, SEMrush) to improve site visibility and performance.

EXPERIENCE

Web Development Intern (OJT) — Clark International Airport Corporation (CIAC) *July - October 2026*
Management Information Systems Division (MISD)

- Led the development of the Risk Management Information System (RMIS), intended to replace an Excel-based risk register.
- Coordinated with a team of interns under the department's staff.
- Handled office technical support tickets, mainly workstation issues.

PROJECTS

Life Saver Care Circle: Clinic Booking & Pharmacy System

- Supported a team in building a booking and ordering system for the client's clinic branches
- Developed with React, Express, and AWS.
- Contributed to quality assurance testing, documentation, and communications with the client.

LoFu - Web-based Lost & Found System

- Collaborated in a group to build a lost & found system with role-based access, intended for the vicinity of Holy Angel University.
- Developed backend logic with Node.js, Express.js, and MongoDB; designed responsive UI/UX wireframes in Figma.

DoMore — Web-based Planner System

- Built a student planner with task tracking and a responsive interface in **Vue.js**.

CafeCrawl — Cafe Blogging Website

- Scaled an individual project into a mock content management system for discovering and rating local coffee shops.
- Implemented interactive front-end features in JavaScript, with PHP and MySQL for data handling.

M&J Quality Used Cars — Business Website & Blog

- Developed a responsive car dealership website and blog using Angular, with an Express and MongoDB backend.
- Applied technical SEO, strategic keyword placement, and content optimization to improve search discoverability.
